Introducing the all-new TDcH Compact Headend

- Exquisite engineering, finely tuned for perfect performance
- Your natural choice for swift, efficient TV distribution
- Save time and costs, with fast, easy installation and remote management
- Fits elegantly into 19" racks
- Reliable, innovative headend expertise from TRIAX

A sleek combination of intuitive software, central decryption and remote access

- Central decryption with CI slots; FTA version available
- Pre-configured for quick installation and reduced costs: DVB-S/S2 in, QAM out
- Remote management for quick and easy support
- Easy and central updates of TV services with LCN
- Straightforward setup and configuration via intuitive GUI

Smooth integration

With 70 years of trailblazing technology, we're proud to be headend experts

TRIAX headends are the truest expression of our values of reliability and innovation. They're developed from the ground up at our headquarters in Denmark, with over 24,000 sold in the last decade alone.

Each and every TRIAX headend guarantees the same quality TRIAX experience, saving time and costs, and increasing your own customer loyalty.

With the TDcH compact headend, we now have a headend to suit the requirements of every installation size and budget.

Proud heritage
