# Renault CAN bus emulator
For instrument cluster repair

Simple connection – 4 wires only: **CAN Low, CAN High, +12v, GND**. After power on emulator turns on dashboard. If everything is connected correctly and there are no CAN faults **RED LED** on emulator board is blinking.

DASHBOARD CONNECTOR:
Renault Scenic, Laguna
1   +12v
2   GND
29   CAN Low
30   CAN High

Renault Megane
1   CAN High
4   CAN Low
